

STRING METaverse LIMITED

Company Profile

BSE Listed | Web3 & AI | India & Dubai

Company Overview

String Metaverse Limited is a publicly listed company on the Bombay Stock Exchange (BSE), operating at the intersection of Web3, Artificial Intelligence, and digital finance. Headquartered in Hyderabad, India, with an international office in Dubai, the company builds products and infrastructure spanning blockchain gaming, algorithmic trading, payments, and decentralized infrastructure.

The company's mission is to build a globally connected Web3 and AI ecosystem — enabling users to earn, trade, and transact through blockchain-powered products. String Metaverse targets 30 million gaming users by 2026 and operates the IDLE token as its central ecosystem currency across products.

Corporate Snapshot

Stock Exchange	BSE (Bombay Stock Exchange) — Listed
Headquarters	Hyderabad, India

Key Products & Platforms

IdleMine 4.0 <i>Gaming · Mobile</i> An idle mobile mining game built on React Native and Expo, where players earn IDLE tokens through gameplay. Targets mass-market Web3 adoption with a simple, accessible interface.	Agent Royale <i>AI Gaming · VPS</i> A VPS-powered AI agent gaming platform where users purchase, train, and deploy AI agents to compete in arena-style battles and earn rewards. The flagship product for FY25-26.
String Pay X <i>Fintech · Payments</i> A crypto payment gateway built on Solana with an IDLE token deposit relay architecture using Jupiter Aggregator. Registered with FINTRAC as a Canada MSB (Money Services Business).	Bills on Chain (BOC) <i>DeFi · Hedera</i> Bill payment infrastructure built on Hedera Hashgraph, centered on the IDLE utility token. Enables users to pay real-world bills using blockchain rails.
Nemo Claw Options Agent <i>HFT · Options</i> Automated options theta strategy engine running diagonal spreads (Poor Man's Covered Call) on Deribit for BTC/ETH and Tastytrade for US equities, with Bayesian nightly optimization.	BENPOS AI Agent <i>Analytics · BSE</i> AI-powered market-maker shareholding analysis tool for BSE BENPOS filings, featuring a six-tier shareholder classification framework for institutional review and compliance.
RivalBet <i>Esports · Betting</i> An esports side-betting platform built on Next.js 15 and Supabase with Whop payments integration, enabling users to place bets on live esports match outcomes.	String Browser <i>Web3 · AI Browser</i> A Web3 AI-agent browser enabling users to interact with decentralized applications and AI agents natively. Targeted for FY25-Q4 launch as a gateway product for the ecosystem.

Strategic Direction

Ecosystem Token: IDLE

The IDLE token (Solana SPL) is the economic backbone of the String Metaverse ecosystem. It flows across gaming rewards (IdleMine, Agent Royale), payment rails (String Pay X), and DeFi utility (Bills on Chain). The IDLE whitepaper serves as the structural template for all future ecosystem token launches.

Dubai Operations

The Dubai office focuses on high-growth verticals: AI Agents, Blockchain Node Operations, and High-Frequency Trading. This office positions String Metaverse for international institutional partnerships and crypto-friendly regulatory jurisdiction.

Growth Targets

- 30 million gaming users by 2026 across IdleMine and Agent Royale
- Expand blockchain infrastructure with Solana node volume growth
- Strengthen DeFi utility through Bills on Chain and String Pay X adoption
- Gold tokenization on Hedera as an asset-backed digital product
- AI/HPC Data Center bid submitted to the Chief Minister of Uttar Pradesh

Inspiration & Model

String Metaverse draws inspiration from Animoca Brands' playbook — specifically its Digital Asset Advisory division — as a model for combining gaming ecosystem development with institutional blockchain business advisory and token monetization at scale.

Token Ecosystem

String Metaverse is building a multi-token ecosystem with IDLE as the primary utility and rewards token. Future ecosystem tokens will follow the IDLE whitepaper as the structural template.

Token Name	IDLE
Blockchain	Solana (SPL Token)
Primary Utility	Gaming rewards, payments, DeFi
Products Using IDLE	IdleMine, Agent Royale, String Pay X, Bills on Chain
Future Tokens	StringTak, Bills on Chain token, Gold Token (Hedera)
Whitepaper Model	IDLE whitepaper as structural template for all ecosystem tokens
